

Security Operations Center

KCi Services: SOC

- SOC is a centralized facility that monitors, detects and responds to cyber security incidents in real time. Professional security analysts will manage threats and ensure your business' security posture is maintained . SOC will help protect your business' assets and data from cyber threats.
- Your business will be provided with continuous monitoring and rapid response to cyber threats. This will enhance overall security and minimize cyber threats.

SOC will:

- Provide 24/7 monitoring
- Respond quickly to cyber incidents
- Help your business meet industry standards for security
